My First Canvas

Aug 06, 2025

PROBLEM

High and unpredictable energy bills for households and businesses

Lack of awareness about energy-efficient appliances and usage habits

Difficulty in accessing reliable information on renewable energy options

SOLUTION

AI-powered chatbot that provides real-time energy usage tips

Personalized recommendations for energy-efficient appliances

Guidance on adopting solar, wind, or other renewable sources based on location and budget

UNIQUE VALUE PROPOSITION

Your smart energy assistant—cut costs, reduce waste, and go green with personalized energy insights.

UNFAIR ADVANTAGE

AI engine trained on regional energy consumption data

Direct integration with smart meters and home devices (IoT ready)

Constantly updated energy-efficiency and appliance database

CUSTOMER SEGMENTS

Urban households with high energy usage

Small and medium businesses aiming to reduce operational costs

Environmentally conscious consumers

Energy utility companies looking to reduce peak loads

EXISTING ALTERNATIVES

Manual tips from blogs or energy providers

Energy audit consultants (expensive and rare)

Government energy awareness programs

KEY METRICS

Number of chatbot interactions per user

kWh savings per household/business

Conversion rates to energy-efficient product purchases

Customer retention and engagement rate

HIGH-LEVEL CONCEPT

ChatGPT for Energy Efficiency” — a friendly, always-on advisor for smarter energy use

CHANNELS

Utility company partnerships

Home appliance retailers and online platforms

Google Assistant / Alexa / WhatsApp integration

Sustainability awareness campaigns and NGOs

EARLY ADOPTERS

Tech-savvy homeowners

Environmentally conscious consumers

Businesses with sustainability or CSR goals

Households with smart home setups

COST STRUCTURE

AI development and maintenance

Energy and appliance data acquisition

Marketing and outreach partnerships

Cloud hosting and chatbot infrastructure

REVENUE STREAMS

Freemium model with premium energy insights or smart device integration

Affiliate commission from energy-efficient product links

B2B licensing to energy providers and smart home services

Consulting fees for business energy optimization plans
